Proceedings

of the Analytical Division of
The Chemical Society

Volume 14 1977

Published by
THE CHEMICAL SOCIETY
BURLINGTON HOUSE, LONDON, W1V 0BN

PROCEEDINGS

OF THE

ANALYTICAL DIVISION OF THE CHEMICAL SOCIETY

Officers of the Analytical Division of the Chemical Society

President
D. W. Wilson, M.Sc., C.Chem., F.R.I.C.

Hon. Secretary
P. G. W. Cobb, C.Chem., F.R.I.C., D.G.A.

Hon. Treasurer
J. K. Foreman, D.Sc., C.Chem., F.R.I.C.

Hon. Assistant Secretaries
D. I. Coomber, O.B.E., B.Sc., Ph.D., C.Chem., M.R.I.C.
D. C. M. Squirrell, B.Sc., C.Chem., F.R.I.C.

Secretary
Miss P. E. Hutchinson

THE ANALYST PUBLICATIONS COMMITTEE

Chairman
H. J. Cluley, M.Sc., Ph.D., C.Chem., F.R.I.C.

L. S. Bark, D.Sc., C.Chem., F.R.I.C.
W. T. Elwell, Ph.D., C.Chem., F.R.I.C.
J. A. Hunter, B.Sc., Ph.D., C.Chem., M.R.I.C.
G. F. Kirkbright, Ph.D., D.Sc., C.Chem., F.R.I.C.
J. M. Ottaway, B.Sc., Ph.D., D.Sc., C.Chem., F.R.I.C.
G. E. Penketh, B.Sc., C.Chem., M.R.I.C.
T. B. Pierce, B.Sc., M.A., D.Phil.
R. Sawyer, B.Sc., C.Chem., M.R.I.C.
W. H. C. Shaw, M.Chem.A., M.Pharm.A., C.Chem., F.R.I.C.
A. Townshend, B.Sc., Ph.D., D.Sc.

Editor, Proceedings
P. C. Weston, B.Sc., C.Chem., M.R.I.C., M.I.Inf.Sc.

Adams, M. J. *See* **Beadle, B.C.**
Adamson, G. W. Automatic methods of handling chemical structure and property information, 26.
Al-Abachi, M. Q. Determination of sulphur compounds of biological and medical importance by molecular emission cavity analysis (MECA), 251.
American Society for Testing and Materials: Procedures for the determination of lead and chromium, 233.
Analytical Division: Education and Training Group Committee. Second Report. Education, training and research in analytical chemistry in universities and polytechnics, 1.

B

Ball, D. J. Some measurements of atmospheric pollution by aerosols in an urban environment, 203.
Band, D. M. *See* **Treasure, T.**
Bark, L. S. Analysts or analytical scientists? 73.
—— Appointed to Chair of Analytical Chemistry at the University of Salford, 370.
—— **Graveling, R. A.,** and **Thomason, H.** Some applications of gas - liquid chromatography in the investigation of the relationship between physiological stress and physical activity, 248.
Barker, S. A. Enzyme immunoassay, 103.
Bawden, D. *See* **Wood, F. E.**
Beadle, B. C., Adams, M. J., and **Kirkbright, G. F.** Some applications of optoacoustic spectroscopy to solid samples, 240.
Beeley, J. A., and **Beeley, J. G.** pH measurements in isoelectric focusing gels using an antimony electrode, 79.
Beeley, J. G. *See* **Beeley, J. A.**
Beezer, A. E. Enzymes in analysis: flow microcalorimetric aspects, 104.
Belcher, R. Obituary of G. F. Smith, 41.
—— New Member of Council, 132.
—— The history of analytical chemistry in America, 161.
Betteridge, D. William Crookes, *Chemical News* and analysis, 179.
Bird, A. E., and **Redrup, C. E.** Mercurimetric assay of penicillins, 285.
Boon, P. F. G., and **Mace, A. W.** Experiences with a semi-automated calculation system applied to the Technicon AutoAnalyzer, 298.
Boumans, P. W. J. M. Is optical emission spectrometry being tailored to the requirements and budgets of a large variety of users? 143.
Bound, G. P. *See* **Forbes, S.**
Bremner, I. Transport and storage of trace metals in animals, 218.
Briggs, D. ESCA with special reference to the determination of anions, 9.
British Standards Institution. Revised British Standard for graduated pipettes, 125.
—— New British Standard specifications for thermometers, 157.
Brookes, H. E. Third Analytical Division Distinguished Service Award conferred on, 314.
Brough, A. W. J., Epton, R., McLaren, J. V., and **Marr, G.** Analytical gel permeation chromatography using bead polymerised poly(acryloylprolylmorpholine), 135.
Broughton, J. R. S. and **Fuller, C. W.** Development of a dedicated atomic-absorption spectrometer for the determination of elements that form volatile hydrides, 112.
Brown, S. S. Code of practice for the use of gas cylinders in analytical laboratories. (Correspondence), 196.
Buck, R. P. The virtues and limitations of ion-selective electrodes for measurements in biological systems, 332.
Burns, D. T. Irish contributions to analytical chemistry, 171.
Bushnell, A. C. Report of Bark's "Analysts or analytical scientists?" 73.
Butlin, A. G. Sources of error in gas-chromatographic analysis, 109.

C

Casy, A. F. Value of tetraphenylborate(III) complexes in the identification of alkaloids and other organic bases in pharmaceuticals by infrared spectroscopy, 292.
Chalmers, R. A. Basic safety in volumetric analysis. (Correspondence), 350.
Chayen, J. Problems of redox measurements in cell physiology, 342.
Clifford, J. M., and **Smyth, W. F.** Use and limitations of polarography in determining plasma drug levels in pre-clinical and clinical pharmacology, 325.
Coker, D. T. Heat desorption of vapour-trapping tubes, 108.
Coles, L. New President of the Association of Public Analysts, 157.
Comité International des Dérivés Tensio-actifs. Questions being studied by the International Analytical Commission, 125.
Coombs, T. L. Uptake and storage mechanisms of heavy metals in marine organisms, 219.
Cosgrove, R. F. Comparison of bioautography using a mycoplasma as test organism with bioautography using a bacterium as test organism, 32.
Coulter, G. L., and **Thompson, W. C.** Automatic analysis of tyre rubber blends by computer-linked pyrolysis - gas chromatography, 212.
Crighton, J. S. Use of thermal degradation for the characterisation of textile materials: a comparison of pyrolysis - gas chromatography and thermogravimetry, 211.

D

Dalziel, J. A. W. *See* **Loscombe, C. R.**
Davidson, I. E., and **Smyth, W. F.** Cathodic-stripping voltammetry of some sulphur-containing organic compounds in biological fluids, 323.
Deans, D. R. Analysis with a purpose, 199.
Doughty, G. M. *See* **Ebdon, L.**
Douglas, A. G. Some aspects of gas chromatography in petroleum prospecting, 111.
Dymond, J. W. A. *See* **Lightbown, J. W.**

E

Ebdon, L., Doughty, G. M., and **Hafferty, B. P.** Application of continuous water-quality monitoring to the study of a grossly polluted stream, 262.

Edmonds, B. Data compilations of interest to analytical chemists, 24.
Enfors, S. O. Some aspects of utilisation of a penicillin-sensitive enzyme electrode in fermentation control, 106.
Epton, R. *See* **Brough, A. W. J.**
Everaerts, F. M. Analytical isotachophoresis, 85.

F

Fairley, H. D. Isotachophoresis, 82.
Fatt, I. Non-invasive methods of blood gas analysis, 329.
Fell, G. S. See **Sabet, S.**
Forbes, S. and **Bound, G.P.** Some investigations into the electroanalytical chemistry of selenium, 253.
Foreman, J. K. Award of 13th Society for Analytical Chemistry Gold Medal to, 313.
Fox, B. W. Report of Fourth International Liquid Scintillation Counting Symposium, 355.
Fuller, C. W. *See* **Broughton, J. R. S.**

G

Garratt, D. C. Second Analytical Division Distinguished Service Award conferred on, 19, 52, 71.
Gordon, G. and **Wood, P. R.** Use of reversed-phase high-performance liquid chromatography in the analysis of products containing halcinonide and triamcinolone acetonide, 30.
Gower, D. C. and **Woledge, R. C.** Isotachophoretic analysis of muscle extracts, 83.
Graveling, R. A. *See* **Bark, L. S.**
Griepink, B., and **Verbruggen, H.** Fast titrations in flow-through systems, 141.
Guilbault, G. G., and **Sadar, M. H.** Analytical use of enzymes, 302.
Gwilliam, L. Computer systems in a steelworks laboratory, 28.

H

Hafferty, B. P. *See* **Ebdon, L.**
Heap, P. F. *See* **Simpson, W. R.**
Hercules, D. M. Characterisation of surface species using electron spectroscopy (ESCA), 187.
Hirst, A. D. Electrodes in clinical chemistry, 345.
Hislop, J. S. Award of 4th Society for Analytical Chemistry Silver Medal to, 19, 50.
Huddleston, J., and **Pierce, T. B.** Two-dimensional light-element profiling with the nuclear microprobe, 246.
Hughes, A. S., and **Popplestone, C. R.** Specific determination of phenoxymethylpenicillin, 288.
Hughes, H. New Member of Council, 132.

I

Imperial Chemical Industries Limited. Analytical Chemist's Committee. Code of practice for the use of gas cylinders in analytical laboratories, 57.
Irwin, W. J. *See* **Slack, J. A.**

J

Johnson, C. A. New Chairman of the Council of Europe's Pharmacopoeia Commission, 270.
Jordan, J. R. *See* **Kelly, R. G.**

K

Kaiser, H. Obituary, 40.
Kakabadse, G. J. Decomposition problems in fluorine analysis, 11.
Kelly, R. G., Jordan, J. R., and **Owen, A. E.** Microelectronic ion-selective electrodes, 338.
Kelly, R. W. Gas chromatography - mass spectrometry in the determination of prostaglandins in semen, 208.
Kirkbright, G. F. *See* **Beadle, B. C.**

L

Lightbown, J. W., Newland, P., Sutherland, I. A., and **Dymond, J. W. A.** Analysis of candicidin and related polyene antibiotics by means of the coil planet centrifuge, 34.
Llewellyn, J. W. Detection of soya protein by isoelectric focusing, 75.
Loscombe, C. R., and **Dalziel, J. A. W.** Use of PVC membrane type calcium electrodes for continuous automatic analysis, 260.

M

Mace, A. W. *See* **Boon, P. F. G.**
McLaren, J. V. *See* **Brough, A. W. J.**
Macleod, I. W., and **Taylor, B. J.** Formation and stability of imidazole - mercury complexes with some β-lactam antibiotics, 37.
Maloney, M. P., Moody, G. J., and **Thomas, J. D. R.** Extraction and separation of metal ions by foam-supported reagents, 244.
Marr, G. *See* **Brough, A. W. J.**
May, E. M., and **Sefton, G. V.** Thin-layer bioautographical detection of β-lactam contaminants in pharmaceuticals, 290.
Miller, C. A. Code of practice for the use of gas cylinders in analytical laboratories. (Correspondence), 266.
Mitchell, R. L., and **West, T. S.** Obituary of H. Kaiser, 40.
Moody, G. J., and **Thomas, J. D. R.** Ion-selective electrodes for biomedical applications, 340.
—— *See also* **Maloney, M. P.**
Moyler, D. A. Some practical experiences of reporting integrators in industrial essential oil analysis, 306.
Munden, R. P. *See* **Selby, D. W.**

N

Newland, P. *See* **Lightbown, J. W.**
Nickless, G. *See* **Simpson, W. R.**

O

Ogleby, J. New Member of Council, 132.
O'Neill, I. K. Fourier transform nuclear magnetic resonance spectroscopy through the Periodic Table, 190.

SUBJECT INDEX

A

Aerosols: Some measurements of atmospheric pollution by —— in an urban environment. Ball, 203.

Air: Heat desorption of vapour-trapping tubes. Coker, 108.

Some measurements of atmospheric pollution by aerosols in an urban environment. Ball, 203.

Alkaloids: Value of tetraphenylborate(III) complexes in the identification of —— and other organic bases in pharmaceuticals by infrared spectroscopy. Casy, 292.

American Chemical Society: Report on Second Joint ACS/CIC Conference, 269.

Amino acids: Determination of sulphur compounds of biological and medical importance by molecular emission cavity analysis, (MECA). Al-Abachi, 251.

Analysts: PAs of the past. Peden, 168.

Analytical chemistry: A history of organic reagents in ——. Stephen, 183.

Analysis with a purpose. Deans, 199.

Analysts or analytical scientists? Bark, 73.

Education, training and research in —— in universities and polytechnics. Second report. Education and Training Group Committee, Analytical Division, 1.

From assaying to —— : how an art became a science. Szabadváry, 167.

Irish contributions to ——. Burns, 171.

The history of —— in America. Belcher, 161.

Analytical Division: 5th A.G.M., 71.

Atomic Spectroscopy Group. 12th A.G.M., 53.

Automatic Methods Group. 11th A.G.M., 20.

Biological Methods Group. 32nd A.G.M., 72.

Chromatography and Electrophoresis Group. 12th A.G.M., 20.

Distinguished Service Award conferred on H. E. Brookes, 314.

Distinguished Service Award conferred on D. C. Garratt, 19, 52, 71.

East Anglia Region. 9th A.G.M., 19.

Education and Training Group. 6th A.G.M., 73.

Electroanalytical Group. 7th A.G.M., 72.

Joint Pharmaceutical Analysis Group. 7th A.G.M., 73.

Microchemical Methods Group. 33rd A.G.M., 72.

Midlands Region. 22nd A.G.M., 19.

New Members of Council, 131.

North East Region. 11th A.G.M., 72.

North West Region. 53rd A.G.M., 72.

Particle Size Analysis Group. 11th A.G.M., 20.

Radiochemical Methods Group. 10th A.G.M., 20.

Robert Boyle Essay awards, 198.

Scottish Region. 42nd A.G.M., 19.

South East Region. 2nd A.G.M., 102.

Special Techniques Group. 32nd A.G.M., 52.

Thermal Methods Group. 12th A.G.M., 20.

Western Region. 22nd A.G.M., 102.

Anion(s): ESCA with special reference to the determination of ——. Briggs, 9.

Ion-selective electrode sensors for determining —— -forming elements. Thomas, 7.

Problems and solutions in the X-ray fluorescence analysis of —— -forming elements. Warren, 13.

Antibiotics: Analysis of candicidin and related polyene —— by means of the coil planet centrifuge. Lightbown, Newland, Sutherland and Dymond, 34.

Formation and stability of imidazole - mercury complexes with some β-lactam ——. Macleod and Taylor, 37.

High-performance liquid chromatography of bleomycins. Williams, 242.

Thin-layer bioautographical detection of β-lactam contaminants in pharmaceuticals. May and Sefton, 290.

Antimony: Development of a dedicated atomic-absorption spectrometer for the determination of elements that form volatile hydrides. Broughton and Fuller, 112.

Arsenic: Development of a dedicated atomic-absorption spectrometer for the determination of elements that form volatile hydrides. Broughton and Fuller, 112.

Automated methods: Experiences with a semi-automated calculation system applied to the Technicon AutoAnalyzer. Boon and Mace, 298.

B

Bibliographical information: Computer-based —— for analytical chemists. Wood and Bawden, 21.

Bioautography: Comparison of —— using a mycoplasma as test organism with —— using a bacterium as test organism. Cosgrove, 32.

Biological cells: Problems of redox measurements in cell physiology. Chayen, 342.

Biological fluids: Cathodic-stripping voltammetry of some sulphur-containing organic compounds in ——. Davidson and Smyth, 323.

Ion-selective electrodes for biomedical applications. Moody and Thomas, 340.

Polarographic methods for use in biological systems. Zuman, 320.

The virtues and limitations of ion-selective electrodes for measurements in biological systems. Buck, 332.

Biological materials: Decomposition problems in fluorine analysis. Kakabadse, 11.

Transport and storage of trace metals in animals. Bremner, 218.

Bismuth: Development of a dedicated atomic-absorption spectrometer for the determination of elements that form volatile hydrides. Broughton and Fuller, 112.

Bleomycins: High-performance liquid chromatography of ——. Williams, 242.

Blood: Comparison of the Delves cup and carbon furnace atomisation used in atomic-absorption spectrometry for the determination of lead in ——. Sabet, Ottaway and Fell, 300.

Non-invasive methods of —— gas analysis. Fatt, 329.

Use and limitations of polarography in determining plasma drug levels in pre-clinical and clinical pharmacology. Clifford and Smyth, 325.

Blood plasma: Measurement of plasma potassium using ion-selective electrodes. Treasure and Band, 334.

C

Calcium: Use of PVC membrane type —— electrodes for continuous automatic analysis. Loscombe and Dalziel, 260.
Calorimeters: Enzymes in analysis: flow microcalorimetric aspects. Beezer, 104.
Candicidin: Analysis of —— and related polyene antibiotics by means of the coil planet centrifuge. Lightbown, Newland, Sutherland and Dymond, 34.
Carbon: Two-dimensional light-element profiling with the nuclear microprobe. Huddleston and Pierce, 246.
Centrifuge: Analysis of candicidin and related polyene antibiotics by means of the coil planet ——. Lightbown, Newland, Sutherland and Dymond, 34.
Chemical Institute of Canada: Report on the Second Joint ACS/CIC Conference, 269.
***Chemical News*:** William Crookes, —— and analysis. Betteridge, 179.
Chemical Society: Additions to Library, 43, 126.
Analytical Chemistry Trust, 267.
Annual Congress, 1977, 101.
Chemical structure: Automatic methods of handling —— and property information. Adamson, 26.
Chromatography: Analytical gel permeation —— using bead polymerised poly(acryloylprolylmorpholine). Brough, Epton, McLaren and Marr, 135.
Characterisation of the selectivity of reversed stationary phases in high-performance liquid ——. Tomlinson, 294.
Heat desorption of vapour-trapping tubes. Coker, 108.
Some applications of gas - liquid —— in the investigation of the relationship between physiological stress and physical activity. Bark, Graveling and Thomason, 248.
Some aspects of gas —— in petroleum prospecting. Douglas, 111.
Some practical experiences of reporting integrators in industrial essential oil analysis. Moyler, 306.
Sources of error in gas-chromatographic analysis. Butlin, 109.
Chromium: Procedures for the determination of lead and ——. American Society for Testing and Materials, 233.
Correspondence: 196, 266, 350.
Crookes: William ——, *Chemical News* and analysis. Betteridge, 179.

D

Data compilations of interest to analytical chemists. Edmonds, 24.
Distinguished Service Award: Conferred on H. E. Brookes, 314.
Conferred on D. C. Garratt, 19, 52, 71.
Drug(s): Determination of sulphur compounds of biological and medical importance by molecular emission cavity analysis (MECA). Al-Abachi, 251.
Role of pyrolysis - gas chromatography - mass spectrometry in the analysis of ——. Slack and Irwin, 215.
Use and limitations of polarography in determining plasma —— levels in pre-clinical and clinical pharmacology. Clifford and Smyth, 325.

E

ESCA. *See* **Spectroscopy, photoelectron.**
Education: Analysts or analytical scientists? Bark, 73.
Recruitment and training of young graduates for analytical laboratories—A personal view from the pharmaceutical industry. Shaw, 54.
training and research in analytical chemistry in universities and polytechnics. Second report. Education and Training Group Committee, Analytical Division, 1.
Electrochemical analysis: Problems of redox measurements in cell physiology. Chayen, 342.
Electrode(s) in clinical chemistry. Hirst, 345.
Ion-selective —— for biomedical applications. Moody and Thomas, 340.
Ion-selective —— sensors for determining anion-forming elements. Thomas, 7.
Measurement of plasma potassium using ion-selective ——. Treasure and Band, 334.
Microelectronic ion-selective ——. Kelly, Jordan and Owen, 338.
pH measurements in isoelectric focusing gels using an antimony ——. Beeley and Beeley, 79.
Some aspects of utilisation of a penicillin-sensitive enzyme —— in fermentation control. Enfors, 106.
The virtues and limitations of ion-selective —— for measurements in biological systems. Buck, 332.
Use of PVC membrane type calcium —— for continuous automatic analysis. Loscombe and Dalziel, 260.
Electrophoresis: *See* **Isoelectric focusing: Isotachophoresis.**
Elements: Ion-selective electrode sensors for determining anion-forming ——. Thomas, 7.
Problems and solutions in the X-ray fluorescence analysis of anion-forming ——. Warren, 13.
Two-dimensional light-element profiling with the nuclear microprobe. Huddleston and Pierce, 246.
Enzyme(s): Analysis by isoelectric focusing of phosphoglucoseisomerases in *Schistosoma* species and their snail hosts. Ross, 76.
Analytical use of ——. Guilbault and Sadar, 302.
immunoassay. Barker, 103.
in analysis: flow microcalorimetric aspects. Beezer, 104.
Some aspects of utilisation of a penicillin-sensitive —— electrode in fermentation control. Enfors, 106.
Equipment news: 61, 92, 151, 192, 228, 264, 347, 363.
Essential oils: Some practical experiences of reporting integrators in industrial essential oil analysis. Moyler, 306.

F

Fermentation: Some aspects of utilisation of a penicillin-sensitive enzyme electrode in —— control. Enfors, 106.
Fluorine: Decomposition problems in —— analysis. Kakabadse, 11.
Food: Proposed legislation. Part 1: Introduction, UK reviews of current legislation and EEC sampling for foodstuffs. 237.
Proposed legislation. Part II: EEC legislation. 314.

G

Gas analysis: Non-invasive methods of blood ——. Fatt, 329.

Gas cylinders: Code of practice for the use of —— in analytical laboratories. Imperial Chemical Industries Limited, Analytical Chemist's Committee, 57.

Code of practice for the use of —— in analytical laboratories. (Correspondence). Brown, 196; Miller, 266; Passway, 351.

Geochemical analysis: Collaboration with Mineralogical Society, 20.

Gold Medal: Awarded to J. K. Foreman, 313.

Awarded to T. S. West, 19, 49, 71.

H

Halcinonide: Use of reversed-phase high-performance liquid chromatography in the analysis of products containing —— and triamcinolone acetonide. Gordon and Wood, 30.

Hormones: Some applications of gas - liquid chromatography in the investigation of the relationship between physiological stress and physical activity. Bark, Graveling and Thomason, 248.

Hydrides: Development of a dedicated atomic-absorption spectrometer for the determination of elements that form volatile ——. Broughton and Fuller, 112.

I

Imidazole - mercury: Formation and stability of —— complexes with some β-lactam antibiotics. Macleod and Taylor, 37.

Information: Automatic methods of handling chemical structure and property ——. Adamson, 26.

Computer-based bibliographical —— for analytical chemists. Wood and Bawden, 21.

Isoelectric focusing: Analysis by —— of phosphoglucoseisomerases in *Schistosoma* species and their snail hosts. Ross, 76.

Detection of soya protein by ——. Llewellyn, 75.

pH measurements in —— gels using an antimony electrode. Beeley and Beeley, 79.

Isotachophoresis: Analytical ——. Everaerts, 85. Fairley, 82.

Isotachophoretic analysis of muscle extracts, Gower and Woledge, 83.

L

Labetalol hydrochloride: Separation of the diastereoisomers of —— by high-performance liquid chromatography. Selby and Munden, 296.

Lead: Comparison of the Delves cup and carbon furnace atomisation used in atomic-absorption spectrometry for the determination of —— in blood. Sabet, Ottaway and Fell, 300.

Industrial toxicity with particular reference to —— and organic compounds. Toothill, 356.

Procedures for the determination of —— and chromium. American Society for Testing and Materials, 233.

Legislation: Proposed ——. Part 1: Introduction, UK reviews of current —— and EEC sampling for foodstuffs, 237.

Proposed ——. Part II: EEC ——. 314.

M

Marine organisms: Measurement and effects of sub-lethal levels of some heavy metals on marine life in simulated marine ecosystems. Topping, 222.

Uptake and storage mechanisms of heavy metals in ——. Coombs, 219.

Mercury: Determination of the subcellular distribution of —— in a *Penicillium* spp. by gel-permeation chromatography and transmission electron microscopy - X-ray energy microanalysis. Simpson, Heap and Nickless, 256.

Metal ions: Extraction and separation of —— by foam-supported reagents. Maloney, Moody and Thomas, 244.

Metals: Measurement and effects of sub-lethal levels of some heavy —— on marine life in simulated marine ecosystems. Topping, 222.

Transport and storage of trace —— in animals. Bremner, 218.

Uptake and storage mechanisms of heavy —— in marine organisms. Coombs, 219.

Molecular emission cavity analysis: *See* **Spectrometry, molecular emission.**

Muscle: Isotachophoretic analysis of —— extracts. Gower and Woledge, 83.

Mycoplasma: Comparison of bioautography using a —— as test organism with bioautography using a bacterium as test organism. Cosgrove, 32.

N

Nuclear microprobe: Two-dimensional light-element profiling with the ——. Huddleston and Pierce, 246.

O

Obituaries: 40.

Organic bases: Value of tetraphenylborate(III) complexes in the identification of alkaloids and other —— in pharmaceuticals by infrared spectroscopy. Casy, 292.

Organic compounds: Cathodic-stripping voltammetry of some sulphur-containing —— in biological fluids. Davidson and Smyth, 323.

Industrial toxicity with particular reference to lead and ——. Toothill, 356.

Organic reagents: A history of —— in analytical chemistry. Stephen, 183.

P

Penicillin, phenoxymethyl-: Specific determination of ——. Hughes and Popplestone, 288.

Penicillin(s): Mercurimetric assay of ——. Bird and Redrup, 285.

Some aspects of utilisation of a —— -sensitive enzyme electrode in fermentation control. Enfors, 106.

Thin-layer bioautographical detection of β-lactam contaminants in pharmaceuticals. May and Sefton, 290.

***Penicillium* spp.:** Determination of the subcellular distribution of mercury in a —— by gel-permeation chromatography and transmission electron microscopy - X-ray energy microanalysis. Simpson, Heap and Nickless, 256.

Petroleum: Some aspects of gas chromatography in —— prospecting. Douglas, 111.

Petroleum products: Heat desorption of vapour-trapping tubes. Coker, 108.

pH measurements in isoelectric focusing gels using an antimony electrode. Beeley and Beeley, 79.
Pharmaceutical preparations: Thin-layer bioautographical detection of β-lactam contaminants in pharmaceuticals. May and Sefton, 290.
Value of tetraphenylborate(III) complexes in the identification of alkaloids and other organic bases in pharmaceuticals by infrared spectroscopy. Casy, 292.
Pharmacopoeia Commission: New Chairman of the Council of Europe's ——, 270.
Pipettes: Revised British Standard for graduated ——. British Standards Institution, 125.
Polarography: Polarographic methods for use in biological systems. Zuman, 320.
Use and limitations of —— in determining plasma drug levels in pre-clinical and clinical pharmacology. Clifford and Smyth, 325.
Pollution: Some measurements of atmospheric —— by aerosols in an urban environment. Ball, 203.
Poly(acryloylprolylmorpholine): Analytical gel permeation chromatography using bead polymerised ——. Brough, Epton, McLaren and Marr, 135.
Polymers: Automatic analysis of tyre rubber blends by computer-linked pyrolysis - gas chromatography. Coulter and Thompson, 212.
Polyurethane foam: Extraction and separation of metal ions by foam-supported reagents. Maloney, Moody and Thomas, 244.
Potassium: Measurement of plasma —— using ion-selective electrodes. Treasure and Band, 334.
Prostaglandins: Gas chromatography - mass spectrometry in the determination of —— in semen. Kelly, 208.
Protein(s): Detection of soya —— by isoelectric focusing. Llewellyn, 75.
Determination of sulphur compounds of biological and medical importance by molecular emission cavity analysis (MECA). Al-Abachi, 251.
Publications received: 44, 99, 129, 159, 234, 271, 310, 352, 367.

R

Royal Institute of Chemistry: Annual Chemical Congress, 1977. Analytical Division symposia, 101.
Rubber: Automatic analysis of tyre —— blends by computer-linked pyrolysis - gas chromatography. Coulter and Thompson, 212.

S

Safety: Basic —— in volumetric analysis, 225.
Basic —— in volumetric analysis. (Correspondence). Chalmers, 350; Pitt, 350; Reid, 351.
Code of practice for the use of gas cylinders in analytical laboratories. Imperial Chemical Industries Limited, Analytical Chemist's Committee, 57.
Code of practice for the use of gas cylinders in analytical laboratories. (Correspondence). Brown, 196; Miller, 266; Passway, 351.
in analytical laboratories. Preparing emergency procedures for a chemical laboratory, 115.
The contents of a laboratory —— manual, 360.
***Schistosoma* species:** Analysis by isoelectric focusing of phosphoglucoseisomerases in —— and their snail hosts. Ross, 76.
Scintillation counting, liquid: Report of Fourth International Symposium, Bath, 1977, 355.
Selenium: Development of a dedicated atomic-absorption spectrometer for the determination of elements that form volatile hydrides. Broughton and Fuller, 112.
Some investigations into the electroanalytical chemistry of ——. Forbes and Bound, 253.
Semen: Gas chromatography - mass spectrometry in the determination of prostaglandins in ——. Kelly, 208.
Silver Medal: Awarded to J. S. Hislop, 19, 50.
Society for Analytical Chemistry: Extraordinary General Meeting, 68.
Fourth International SAC Conference. Birmingham, July 1977, 275.
Gold Medal awarded to J. K. Foreman, 313.
Gold Medal awarded to T. S. West, 19, 49, 71.
Silver Medal awarded to J. S. Hislop, 19, 50.
Solid samples: Some applications of optoacoustic spectroscopy to ——. Beadle, Adams and Kirkbright, 240.
Soya beans: Detection of soya protein by isoelectric focusing. Llewellyn, 75.
Species: Characterisation of surface —— using electron spectroscopy (ESCA). Hercules, 187.
Spectral data: Data compilations of interest to analytical chemists. Edmonds, 24.
Guide to the published collections of —— held by the Science Reference Library, 198.
Spectrometer: Development of a dedicated atomic-absorption —— for the determination of elements that form volatile hydrides. Broughton and Fuller, 112.
Spectrometry: Comparison of the Delves cup and carbon furnace atomisation used in atomic-absorption —— for the determination of lead in blood. Sabet, Ottaway and Fell, 300.
Is optical emission —— being tailored to the requirements and budgets of a large variety of users? Boumans, 143.
Spectrometry, molecular emission: Determination of sulphur compounds of biological and medical importance by molecular emission cavity analysis (MECA). Al-Abachi, 251.
Spectrometry, X-ray fluorescence: Problems and solutions in the X-ray fluorescence analysis of anion-forming elements. Warren, 13.
Spectroscopy: Some early British contributions to atomic —— (1672–1835). West, 177.
Spectroscopy, nuclear magnetic resonance: Fourier transform —— through the Periodic Table. O'Neill, 190.
Spectroscopy, optoacoustic: Some applications of —— to solid samples. Beadle, Adams and Kirkbright, 240.
Spectroscopy, photoelectron: Characterisation of surface species using electron —— (ESCA). Hercules, 187.
ESCA with special reference to the determination of anions. Briggs, 9.
Spectroscopy, X-ray emission: Nomenclature, symbols, units and their usage in ——. West. (Correspondence), 197.
Standards: The Community Bureau of Reference (BCR). van der Eijk, 53.
Steel: Computer systems in a steelworks laboratory. Gwilliam, 28.
Sulphonamides: Analysis of —— and their metabolites by pyrolysis - gas chromatography - mass spectrometry. Slack and Irwin, 249.
Sulphur: Determination of —— compounds of biological and medical importance by molecular emission cavity analysis (MECA). Al-Abachi, 251.

Surface analysis: Characterisation of surface species using electron spectroscopy (ESCA). Hercules, 187.
Surfactants: Questions being studied by the International Analytical Commission of the Comité International des Dérivés Tensio-actifs, 125.

T

Tellurium: Development of a dedicated atomic-absorption spectrometer for the determination of elements that form volatile hydrides. Broughton and Fuller, 112.
Tetraphenylborate(III): Value of —— complexes in the identification of alkaloids and other organic bases in pharmaceuticals by infrared spectroscopy. Casy, 292.
Textile materials: Use of thermal degradation for the characterisation of ——: a comparison of pyrolysis - gas chromatography and thermogravimetry. Crighton, 211.
Thermometers: New British Standard specifications for ——. British Standards Institution, 157.
Titrations: Fast —— in flow-through systems. Griepink and Verbruggen, 141.
Toxicity: Industrial —— with particular reference to lead and organic compounds. Toothill, 356.
Triamcinolone acetonide: Use of reversed-phase high-performance liquid chromatography in the analysis of products containing halcinonide and ——. Gordon and Wood, 30.

U

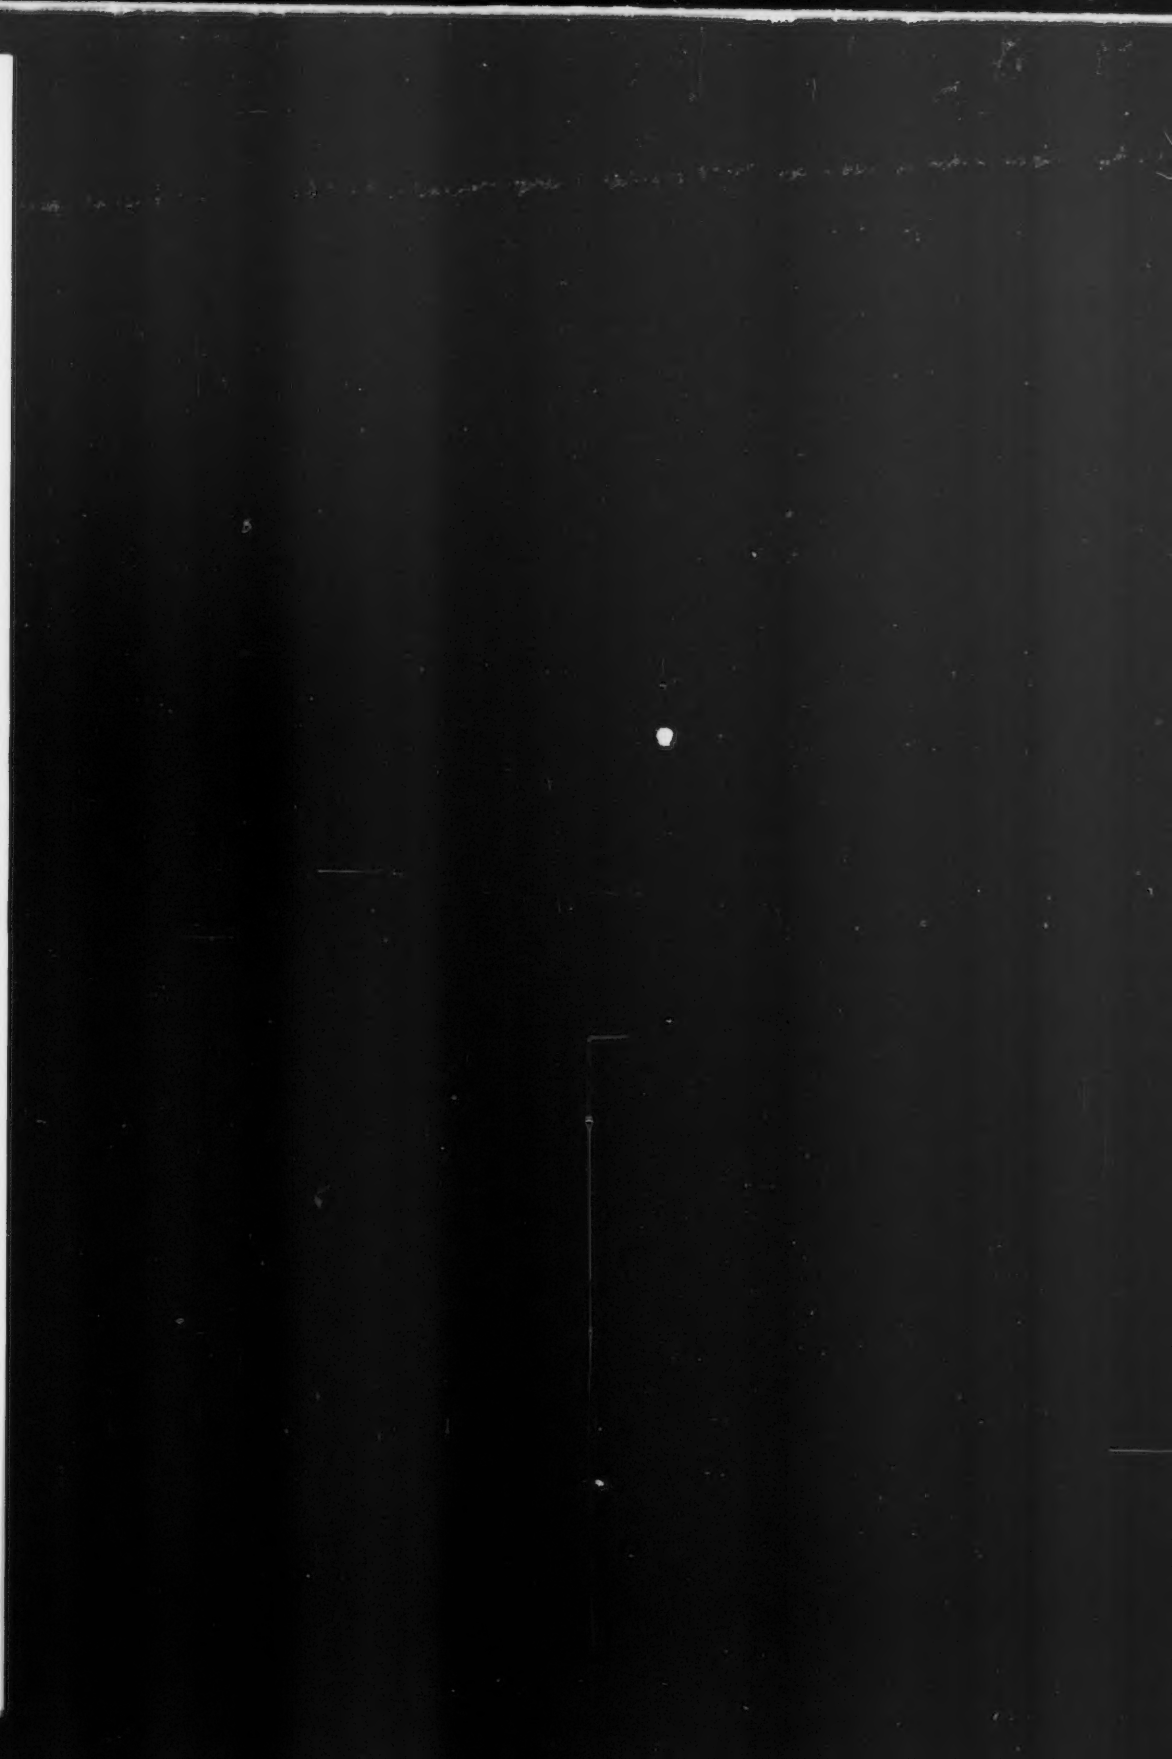
Urine: Some applications of gas - liquid chromatography in the investigation of the relationship between physiological stress and physical activity. Bark, Graveling and Thomason, 248.

V

Voltammetry: Cathodic-stripping —— of some sulphur-containing organic compounds in biological fluids. Davidson and Smyth, 323.
Volumetric analysis: Basic safety in ——, 225.
Basic safety in ——. (Correspondence). Chalmers, 350; Pitt, 350; Reid, 351.
Fast titrations in flow-through systems. Griepink and Verbruggen, 141.

W

Water, industrial: Automatic control of waterside chemical conditions in power station boilers using conductivity measurements. Smith, 138.
Water, natural: Application of continuous water-quality monitoring to the study of a grossly polluted stream. Ebdon, Doughty and Hafferty, 262.
Use of PVC membrane type calcium electrodes for continuous automatic analysis. Loscombe and Dalziel, 260.
—, **sea:** Measurement and effects of sub-lethal levels of some heavy metals on marine life in simulated marine ecosystems. Topping, 222.

X


X-ray fluorescence spectrometry: *See* **Spectrometry, X-ray fluorescence.**
X-ray photoelectron spectroscopy. *See* **Spectroscopy, photoelectron.**
